Hi Tom, we accepted all of your comments except for one. The last comment that references residential lead concentration, we did not change (comment 6 on p.3 of enclosure). 80 ppm is lower than 320 mg/kg (commercial/industrial concentration exposure standard), so we are suggesting residential exposure level for those places that do not use enclosure.

Let us know if you have questions, thanks.

Subject: Exide Comments for your review and signature

Hi Tom, Nathan and I put these comments together. They have been reviewed by Barbara and Rebecca Sugerman. Please review and edit as appropriate. The public comment period ends on Monday, March 28, 2016 and we'd like to get our comments with signature out before COB Monday.

Let us know if you have any questions or concerns, thanks.
